AGRICULTURE PHOTO CONTEST

The Agribusiness Division received 455 great photographs and brought in additional judges to help with the judging process. This year scoring was based on four criteria: WOW factor, composition, viewpoint and originality/artistic merit.

A number of new contestants entered in addition to many returning participants,

for a total 51 contestants, including one youth contestant.

This year the division implemented an on-line submittal of entries which made it easier for contestants to submit their photos. The majority of the photos received were online submissions.

Many of the photographs are featured in the 2013 AgriCulture calendar, which is included with this *AGtivities*.
